- Monitor the progress of the site from start to finish

### Al-BONYAN for Engineering and Contracting

#### Site Supervisor

Lebanon,05/2022-12/2023

- Overseeing on-site construction and renovation activities at public Lebanese schools, ensuring compliance with project specifications, safety regulations, and quality standards in construction projects spanning roads, infrastructure, buildings, and municipal services.
- Managing and coordinating the work of subcontractors, suppliers, and construction teams to ensure efficient workflow, timely completion of renovation tasks, and adherence to project schedules and budgets.
- Conducting regular site inspections and quality control checks to assess workmanship, identify potential issues or risks, and implement corrective actions to maintain high-quality renovation standards.
- Providing leadership and guidance to construction teams, including foremen, laborers, and equipment operators, to promote a safe working environment, teamwork, and productivity on-site.
- Collaborating with project managers, engineers, and school administrators to communicate project progress, address concerns or challenges, and resolve any issues that may arise during the renovation process.
- Maintaining accurate records of daily renovation activities, including progress reports, work schedules, and material deliveries, and preparing timely reports for project management and stakeholders.
- Upholding the company's commitment to environmental sustainability and safety by implementing and enforcing safety protocols, promoting waste reduction, and minimizing environmental impact on renovation sites.

**Civil Engineer**

- Overseeing all on-site activities, including subcontractors, field personnel, deliveries, and installations; creating daily work schedules and preparing work charts.
- Developing Bar Bending Schedules for Steel Reinforcement Works (Rebar Works) and performing Quantity Take-offs from drawings in a timely manner.
- Ensuring the quality of steel work in slabs, beams, and columns prior to concreting through thorough checks.
- Directing and managing construction, installation, maintenance, support, documentation, and testing activities to ensure adherence to specifications, codes, and client requirements.
- Interpreting engineering drawings accurately to guide construction activities effectively.
- Generating construction project bills of quantities (BOQ) to facilitate project cost estimation and budgeting.
- Providing regular updates and feedback to the project manager (PM) regarding the project's status, including schedule progress, delays, or any issues encountered with trades.
